

Tips + Resources for Mac OS X

Other Tips

- *Mac OS X Command Key Tip:* To select multiple noncontiguous items in list view, hold down the Command key (the Shift key equivalent in Mac OS 9)
- *Mac OS X Create Alias Newbies Tip:* To create an alias in a specific location rather than in the parent folder, hold down the Command and Option keys while dragging the item to the preferred location.
- *Mac OS X Dialog Tip:* Hit the Esc key to close a dialog.
- *Mac OS X Dock Enclosing Folder Tip:* Hold down the Command key while clicking on an application icon in the Dock to open the application's enclosing folder.
- *Mac OS X Dock Hide Tip:* Hold down Option and click on an open application's icon in the Dock to hide the frontmost application's windows and bring the selected application to the front.
